Progetto di Statistica Iterazione

Daniele Zago   Simon Mazzarolo   Silvia Brosolo   Emanuele Donà

15 maggio 2021
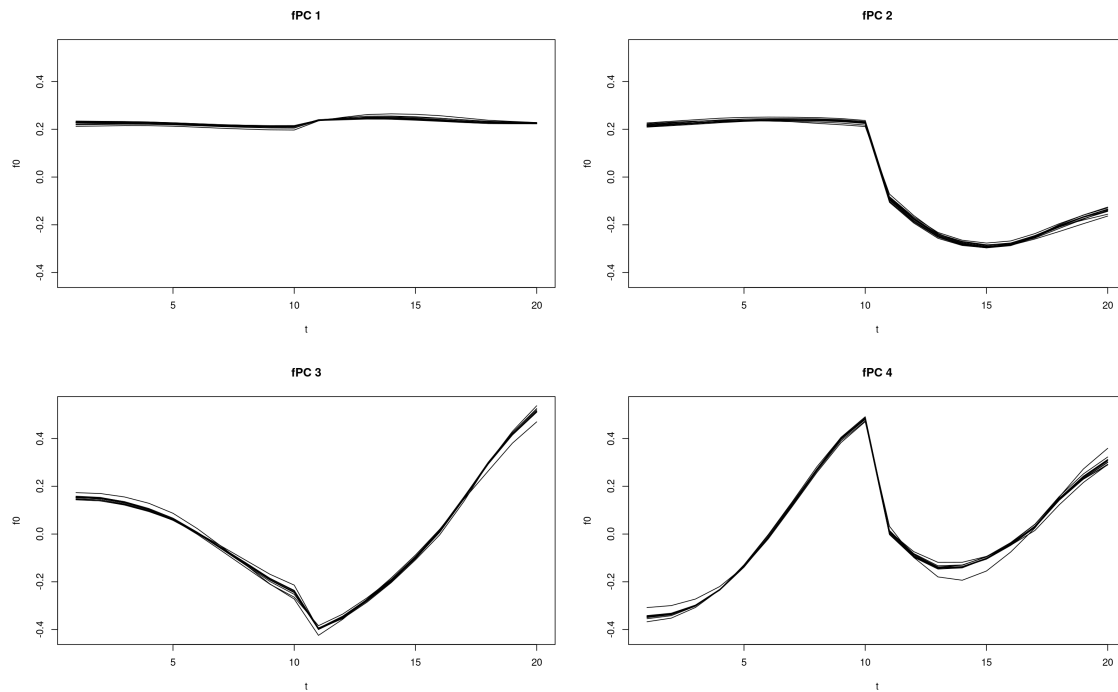

1   Analisi esplorativa

Figura 1: Prime quattro componenti principali funzionali stimate rimuovendo un soggetto alla volta.

2   Modellazione ad effetti misti

3   Componenti principali funzionali

4   Confronto tra modelli

5   Conclusioni
